

CSC 303 PRE-CLASS EXERCISE

Please kindly ensure you create the following files before our meeting tomorrow, we might be in need of them. So, creating them now will save a great deal of our time.

- 1a. Using MS-Access, create a database, name 'skolmgt'.
- b. With the database, design the underlisted tables/files:
 - i. studfile
 - ii. lecturersfile
 - iii. mgtfile

NB

- At this level, u should know the fields that each file should contain
- Don't bother populating the tables

- 2a. Using MySQL, create a database, name 'nacoss'
 - b. With the database, design/create the underlisted tables/files:
 - i. nacosspay (containing info about people that av paid their nacoss due)
 - ii. nacoss spend (containing info about expenditures incurred by nacoss)
- Populate each tables/files in the nacoss database with 20records.
 - Create a search/report path for identifying payment status according to:
 - Level
 - Gender
 - Amount

NB

- Since I suppose to have you 1-3, use the period to execute this assignment.
- Let all the works reside on your system for my verification when I return on Tuesday.
